Abstract. Here goes the text of an abstract (the same as the one given in the submission). If you want you may add keywords after the abstract. Then eject a page.

1. The first Section

The layout of the paper is left to the authors. We do not impose any particular style, nor do we provide macros to make the paper. The only thing to keep in mind is that your paper will be printed both in A4 format (29.7cm$\times$21.0cm) and in Legal format (27.9$\times$21.6cm), so do not make the pages too wide or too high. The title page must contain a blank space of 10.3cm from the top edge of the paper to the upper end of the title for the A4 format and 8.8cm for the legal format, for us to insert the logo, volume number and paper number. References may be cited in any convenient style. We encourage full citations, i.e., with title, and beginning and end pages. The references should be grouped at the end of the paper.

References.
