

Tri-modal Human Body Segmentation

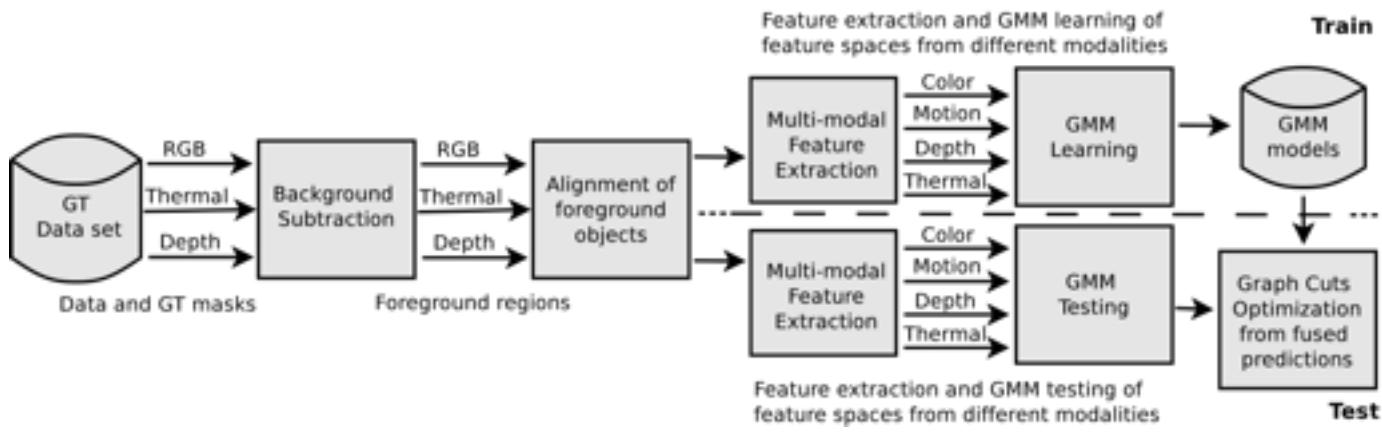

Cristina Palmero, Albert Clapés, Chris Bahnsen,
Andreas Møgelmose

Advisors: Sergio Escalera, Tomas B. Moeslund

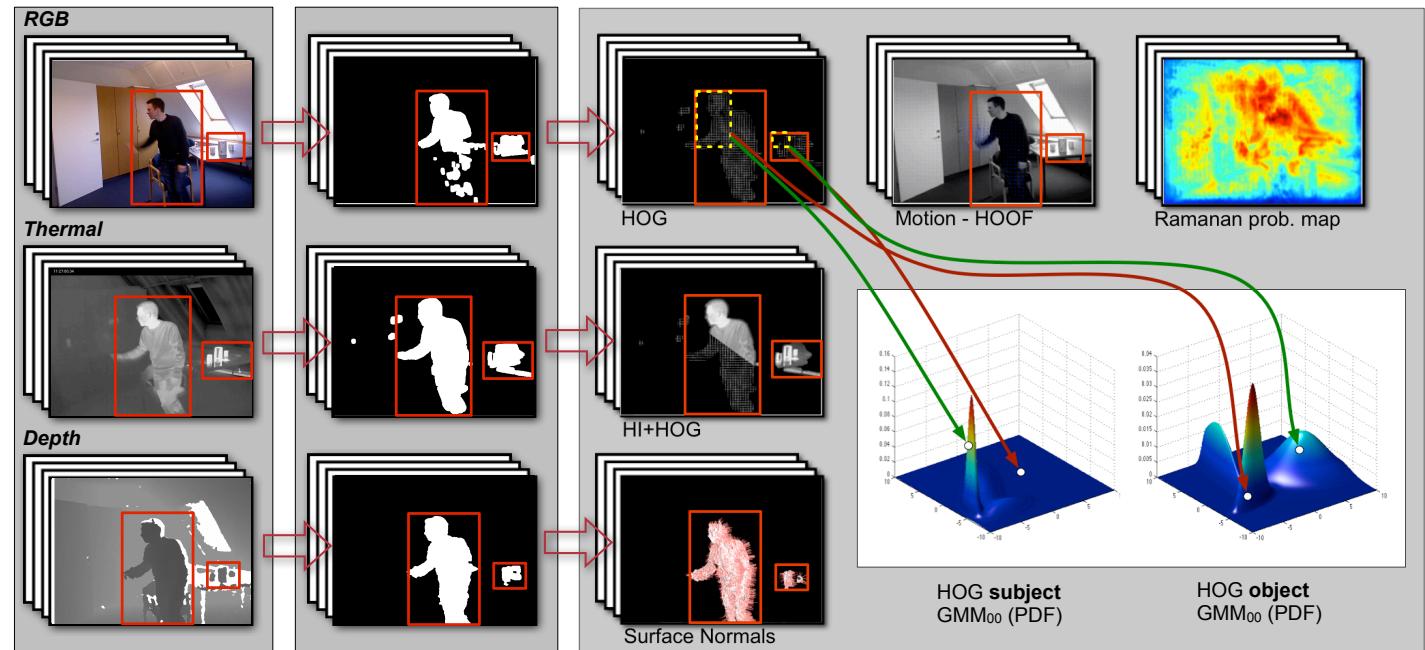

Summary of Previous and Current Work

Baseline
definition

Qualitative
Results

Future Work

Quantitative results

- Human prediction probabilities from different modalities.
- Early vs. late fusion comparison.

Graph Cuts
Optimization
Segmentation

Toy example

Log-likelihood of GMM models (BGD,FGD) over RGB

$$E(\underline{\alpha}, \mathbf{k}, \underline{\theta}, \mathbf{z}) = U(\underline{\alpha}, \mathbf{k}, \underline{\theta}, \mathbf{z}) + V(\underline{\alpha}, \mathbf{z})$$

Pixel differences based on RGB Euclidean distance

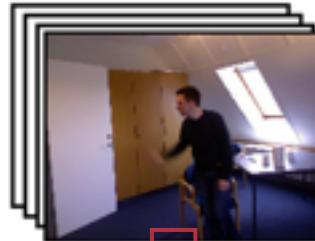

C Rother, V Kolmogorov, A Blake. "Grabcut: Interactive foreground extraction using iterated graph cuts", ACM Transactions on Graphics, 2004.

Your personal challenge

Short term

- Expected result ☺

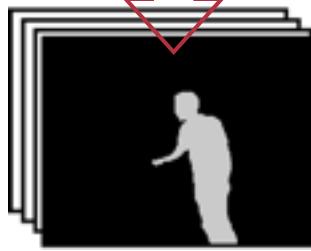

RGB

Thermal

Depth

Long term

...towards a Ph.D.
